

Name: Jeese O M Flana

Reg No: 411625104021

Department: B.E CSE

Subject: Web Interface Unit 04

Batch : 04

Project 02 : Advanced User Registration Form using React

Aim

To design and develop a personal portfolio website using React and React Router that displays personal information, skills, and contact details through multiple navigable pages.

Procedure

1. Create a React application using Vite.
2. Create a Portfolio.jsx component to contain the portfolio website.
3. Create separate components for **Home, About, and Contact** sections.
4. Use BrowserRouter to enable client-side routing.
5. Use Routes and Route to define different pages.
6. Use Link components to navigate between Home, About, and Contact pages.
7. Add personal details such as name, department, year, and skills.
8. Add contact information and a contact form.
9. Create Portfolio.css to style the navbar, pages, buttons, information box, and contact form.
10. Add hover effects and responsive-looking layouts using CSS.
11. Import the Portfolio component into App.jsx.
12. Run the React application and test navigation between all pages.

React Concepts Used

- **Functional Components** are used to create Home, About, Contact, and Portfolio components.
- **React Router** is used for client-side navigation.
- **BrowserRouter** is used to enable routing in the application.
- **Routes and Route** are used to define different URL paths.
- **Link** is used for navigation without reloading the page.

- **JSX** is used to create the webpage structure.
- **Component-based Development** is used to divide the portfolio into reusable sections.
- **CSS Styling** is used to design the portfolio layout and user interface.

Portfolio.jsx

```
import React from "react";
import { BrowserRouter, Routes, Route, Link } from "react-router-dom";
import "./Portfolio.css";
```

```
/* ----- HOME ----- */
function Home() {
  return (
    <div className="page">
      <h1>Hi, I'm Flana 🙋‍♀️</h1>
      <h2 className="highlight">B.E.CSE Student</h2>
      <p>
        Welcome to my personal portfolio. I am interested in
        web development and AI.
      </p>
      <Link to="/about" className="button">
        Know More →
      </Link>
    </div>
  );
}
```

```
/* ----- ABOUT ----- */
function About() {
  return (
```

```

<div className="page">

  <h1>About Me</h1>

  <p>

    I am a II Year B.E.CSE.

    I enjoy learning programming, web development,
    and cyber security concepts.

  </p>

  <div className="info">

    <p><strong>Name:</strong> Flana</p>

    <p><strong>Department:</strong> B.E.CSE</p>

    <p><strong>Year:</strong> II Year</p>

    <p><strong>Skills:</strong> Java, Python, React, HTML, CSS</p>

  </div>

</div>

);
}

/* ----- CONTACT ----- */

function Contact() {
  return (
    <div className="page">

      <h1>Contact Me</h1>

      <div className="contact-box">

        <p>✉ Email: jeese.flana@example.com</p>

        <p>☎ Phone: +91 8072170874</p>

        <p>📍 Location: Tamil Nadu, India</p>

      </div>

      <form onSubmit={(e) => e.preventDefault()}>

```

```

    <input type="text" placeholder="Your Name" required />
    <input type="email" placeholder="Your Email" required />
    <textarea placeholder="Your Message" required></textarea>

    <button type="submit">
        Send Message
    </button>
</form>
</div>
);
}

```

```

/* ----- MAIN ----- */

function Portfolio() {
    return (
        <BrowserRouter>
            {/* NAVBAR */}
            <nav className="navbar">
                <h2 className="logo">My Portfolio</h2>
                <div className="nav-links">
                    <Link to="/">Home</Link>
                    <Link to="/about">About</Link>
                    <Link to="/contact">Contact</Link>
                </div>
            </nav>

            {/* ROUTES */}
            <Routes>
                <Route path="/" element={<Home />} />
            </Routes>
        </BrowserRouter>
    );
}

```

```
    <Route path="/about" element={<About />} />
    <Route path="/contact" element={<Contact />} />
  </Routes>
</BrowserRouter>

);
}
```

```
export default Portfolio;
```

Result

The Personal Portfolio Website was successfully developed using React and React Router. The project demonstrates functional components, JSX, client-side routing, BrowserRouter, Routes, Route, Link navigation, CSS styling, and a contact form. The website provides separate Home, About, and Contact pages with smooth navigation between them.
